

Report to Committee of the Whole

Date: 3/10/2025
From: Chad Kean, Manager of Public Works
Re: Award Calcium Chloride Tender

RECOMMENDATION

THAT the Committee of the Whole receive for information the report to Award the Calcium Chloride Tender;

AND THAT the Committee directs staff to bring the final request to award the Calcium Chloride Tender to Da Lee Dust Control at a cost of \$0.388/L, at an anticipated volume of 160,000L, for an anticipated total cost of \$62,080 (excluding HST), to the March 24th Regular Council Meeting.

BACKGROUND

The Village of Merrickville-Wolford awards the application of 160,000L of calcium chloride / dust suppressant annually to a qualified contractor for the gravel road network. Ideally the application of calcium chloride / dust suppressant would occur in June, however the application is weather dependent.

ANALYSIS

Historically, Merrickville-Wolford does not divide dust suppressant tenders into areas for price optimization. This is a reflection of the distance suppliers need to travel to the Municipality, whereas there is no minimum incentive for price reductions.

Based on the extent of the Municipality gravel road network, there are several roads that require dust suppression. Traditionally the Township utilizes 8 loads of 20,000L per load, equating to 160,000L of dust suppressant for the gravel road network.

The Municipality released a tender on January 24, 2025 on Biddingo and the Village's website. The tender closed on February 14, with one bid submission received.

This tender is one (1) year, whereas further tenders for Calcium Chloride will consider additional annual extensions and will be presented to Council accordingly.

BUDGET/LEGAL IMPLICATIONS

Note that the 2025 budgeted amount is \$60,000.00.
This equates to a budgeted Public Works Operating Line Item increase of \$2,080.00.

Staff recommend that the additional funds of \$2,080 be drawn from reserves.

CONCLUSION

Option 1 – Award the Tender to Da Lee - Recommended

Staff recommends that Council direct staff to award the tender to Da Lee for the submitted cost of \$0.388/L. With an anticipated amount of 160,000L, the final cost would be \$62,080.00.

Option 2 – Retender – Not Recommended

Council may choose to have staff retender for more bidders with competition. This option provides no guarantee that further bidders will submit costs. This option may also affect the application date of the dust suppressant in June.
